

Please note the following:

- Name tags are required on all suitcases
- Sporting gear must be in secure and appropriate containers with locks
- It is unavoidable to prevent minor damage to outer luggage due to systems used by transportation companies
- Cartons may be re-opened by customs or airlines for security purposes only
- All shipments sent by air are subject to security and/or x-ray examination

The following prohibited items will **NOT** be allowed for inclusion in your luggage:

DANGEROUS GOODS & HAZARDOUS ITEMS

- Dry Ice
- Chemicals
- Firearms & Weaponry and their parts
- Explosive Flammable items (glue with thinners, lighter with or without gas, lacquer, nail polish, paint, wax, petroleum, perfumery products with flammable solvents, ink for printing, hair spray)
- Dry Battery with lithium & potassium
- Thermometer containing mercury

If you are uncertain about how to pack your goods please do not hesitate to contact us at info@rolltravlsmart.co.za.

A commercial invoice is required for customs purposes for international services

USEFUL PACKING TIPS

The easiest way to travel is to pack as lightly as possible

Airlines enforce rules on the amount and size of both cabin and checked luggage

Total measurements for all cabin classes must not exceed 115cms

One case per person and one piece of hand luggage is the best way to travel

Always make a list of items you are taking with as this will be invaluable should your luggage be lost or stolen

Check weather conditions before hand via the internet, and be prepared

Roll clothing to fill small spaces and in a clockwise direction pack as tightly as possible by filling all corners of the case

Pack heavy items close to the wheels at the bottom as this will add stability to the case. Stuffing your shoes with underwear or socks will avoid your shoes being crushed, and is a great way of filling dead space

Always carry your travel documents, medication, jewellery, traveler's cheque, keys and other valuables in your hand luggage

Lock your luggage to avoid accidental opening due to rough handling or cabin pressure. Carry the keys to your luggage in your hand luggage - write down the combination of your lock.

Always remove old baggage claim checks as this avoids confusing baggage handlers about your current destination.

Two pieces of luggage are easier to carry than one. If one gets lost you'll still have some belongings.
